Profile

Experienced Java developer with diverse skill set and creative drive to software application development. Proficient at designing computer systems, with writing code in various languages. Specialises in thinking outside the box to find unique solutions to difficult software problems. Effective in managing multiple assignments under extreme pressure while meeting tight deadlines.

Experience

2019-03 – present

Remote Java/Hybris Consultant
Self-employed

- Worked fully remotely on a B2B Hybris project for Konecranes - the work included participating in Scrum meetings, implementing new features, writing unit tests, and demoing progress to the customer.
- Worked as a freelancer to create a small application for a Romanian school that allowed teachers to create online quizzes for students (Spring Boot, Spring Data, jQuery, Bootstrap).

Technologies: Java 8, SAP Hybris 5.7, Spring / Spring Boot, Spring Data, MySQL

2019-05 – 2021-07
Poland/Switzerland

Tech Lead
e-sphere

- Designed and implemented new features for the company's own e-commerce product (technologies: Java 8, Spring Boot, Bootstrap, MySQL, Vue.js) called Digitalfeld
- Worked on existing Hybris implementation for a Swiss wholesaler - added new features, fixed bugs, customized the search heavily (Apache SOLR), integrated the shop with third-party systems, and participated in the full lifecycle process (design, implementation, and deployment)
- Managed a small development team consisting of three people

Technologies: Java 8, SAP Hybris 1905, Vue.js, Spring / Spring Boot, MySQL, Apache SOLR, jQuery, Twitter Bootstrap, Google Cloud (basic usage)

2018-08 – 2019-03
Wrocław, Poland

Senior Hybris Developer
Solsoft Ltd.

- Worked on a Hybris B2B store - developed new features (back-end and front-end), fixed bugs, and wrote unit and integration tests.
- Pair-programmed with junior developers (both back- and front-end).
- Participated in various Scrum meetings; actively took part in planning and development architecture meetings.
- Supervised and maintained internal Hybris training material.

Technologies: Java 8, SAP Hybris 5.7, Spring, jQuery, Twitter Bootstrap

2018-05 – 2018-08
Wrocław, Poland

Senior Java Engineer
Sii Poland Ltd.

- Outsourced to Nokia Solutions & Networks where I stayed for the whole period.

Experience

- Developed new features, fixed bugs, and wrote unit tests in the client's Swing-based GUI application.
- Participated in Scrum meetings, performed code review, and took part in pair programming
- Learned the basics of using Jenkins and Gerrit to maintain Continuous Integration.
- Helped other outsourced people from Sii get to know the internals of the client's system.

Technologies: Java 8, Swing, Spring

2018-04 – 2018-05
Wroclaw, Poland

IT Subject Matter Expert - Java/Hybris
3M Service Center EMEA

- Participated in daily Tier 1 and SCRUM meetings and discussed work on a daily basis.
- Came up with an improvement plan that allowed to reduce time to develop new features and fix bugs by nearly 30%.
- Introduced three junior developers to the Hybris platform by performing training sessions.

Technologies: Java 8, SAP Hybris 5.7, Spring

2015-09 – 2018-04
Katowice, Poland

Hybris Developer / Senior Java Developer
Si-eCommerce

- Designed and developed Hybris data models and features.
- Maintained and managed source code and release cycles.
- Worked closely with clients to deliver functionalities on time and budget.
- Created internal software for rapid porting of product catalogs from existing websites into Hybris.
- Trained junior developers by preparing assignments and pair programming with them.
- Worked on pre-sales presentations for potential clients by implementing simple commerce systems based on Hybris accelerators.

Technologies: Java 8, SAP Hybris 5.7, Spring, Apache SOLR, MySQL, Oracle DB, jQuery, Twitter Bootstrap

2014-04 – 2015-09
Denver, CO,
United States (remote)

Software Developer / Team Leader
Gociety, Inc.

- Responsible for adding new functionality to the site.
- Wrote new code, fixed bugs, and coordinated the development process.
- Managed the project’s AWS cloud deployment.
- Clearly and regularly communicated with management to discuss progress and ideas.
- Managed the local team of developers - assigned tasks, performed code review, done pair programming.

Technologies: Java 7, Spring, Groovy & Grails, jQuery, Twitter Bootstrap

2013-02 – 2014-03
Katowice, Poland

Full Stack Developer / Team Leader
Learnplace.pl, Ltd

- Responsibilities included team management and full stack programming.
- Responsible for developing a social networking site for people interested in various outdoor activities.
- Led a group consisting of four developers - assigned tasks, and reported progress to management.
- Worked on statistics dashboard for sales managers (temporarily - helped with bug fixing to meet deadlines).

Technologies: Java 7, Spring, jQuery, Twitter Bootstrap

2012-05 – 2012-12
Troy, NY,
United States (remote)

PHP Developer
Web Scribble Solutions, Inc.

- Expanded the company’s job board software with new functionalities and fixed existing bugs.

Experience

- Served as back-end development, but occasionally worked on front-end as well.
- Ensured to resolve identified issues related with development to different customers.
- Tested and analyzed features and reported the same to the manager.

Technologies: PHP, jQuery

2011-06 – 2012-05
Katowice, Poland

Junior Software Developer / Quality Assurance
ProIntegra

- Assisted during the development of an intranet portal for a major bank in Poland by writing small utility software.
- Helped with manual tests of the portal.
- Prepared detailed reports concerning project specifications and activities.
- Modified existing software to correct errors, upgrade interfaces and improve performance.

Technologies: C#

Projects

2016-01 – 2018-01

Vodafone Hungary

- Hybris-based implementation of a web shop for Vodafone Hungary.
- Made heavy Backoffice customizations (custom widgets, access rights management, and ticket system).
- Several front-end related changes (adapting the Telco accelerator to client's wireframes).
- Various back-end modifications (for example, bulk data loading from an Excel file).
- Regularily worked with the client on-site to ensure that work is being done according to the requirements and on time.

2017-02 – 2017-04

Durex

- Reduced the complexity of deploying multiple language versions of the same Hybris online store to different servers by merging several codebases into one and exposing the translated stores via separate URLs.
- Worked on fixing problems with third-party integrations.
- Helped with bug fixing both the front-end and the back-end to meet tight deadlines.

2016-10

Orange Poland

- Small Hybris submodule responsible for displaying services' availability and collecting marketing information from customers.
- Made SOLR index changes to allow for fast retrieval of available services.
- Small front-end modifications to match the look-and-feel of the application to client's wireframes.

2014-04 – 2015-09

Gociety

- Performed full-stack development - from creating the front-end through implementing the Java back-end.
- Designed and implemented a dedicated Javascript framework for the application.
- Worked on porting the system to Groovy and Grails and switching to a SQL database.
- Helped with deploying the application to the AWS cloud.
- Talked daily to the US team to fully understand their ideas and help implement them.
- Designed and implemented a REST API for a mobile application.

Education

2009 – 2013
Sosnowiec, Poland

IT Technician
Zespół Szkół Elektronicznych i Informatycznych

- Specialization: Repair and maintenance of computer hardware
